PROFILE

Computer Science and Engineering graduate from Kamala Institute of Technology and Sciences (affiliated with JNTUH), interested in software development and web technologies. Project work includes a doctor appointment system, rescue agency services platform, and blockchain-based crowdfunding system. Seeking an entry-level opportunity to apply programming skills and continue learning.

TECHNICAL SKILLS

Programming	Python, Java, JavaScript, C Programming
Web	HTML, CSS, Bootstrap, React, Tailwind CSS
Database / Tools	MySQL, phpMyAdmin, REST API calls, Solidity

PROJECTS

Doctor Appointment System

Hospital management system concept to streamline patient records, appointments, and billing, with a responsive interface, appointment tracking, and notifications. **Technologies:** HTML, CSS, JavaScript, phpMyAdmin.

Rescue Agency Services

Platform concept for ambulance, fire, and roadside assistance requests, with location-based vehicle tracking, an admin dashboard, and SMS/email alerts. **Technologies:** HTML, CSS, JavaScript, REST API calls, Bootstrap.

Blockchain-based Crowdfunding System

Crowdfunding platform using a React interface and Solidity smart contracts to support transparent transactions and project visibility. **Technologies:** HTML, Tailwind CSS, JavaScript, React, Solidity.

EDUCATION

Bachelor's in Computer Science and Engineering · 2020–2024
Kamala Institute of Technology and Sciences (affiliated with JNTUH) · GPA: 6.25 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Python Programming Certificate — HDLC Technologies
- Full Stack Web Development Internship Certificate — Bharath Intern
- Participated in a 48-hour hackathon and a one-week Full Stack Web Development workshop — Brainovision

ONLINE PROFILES

LinkedIn: Add your profile URL · GitHub: Add your profile URL

Before applying: Add your real LinkedIn/GitHub links and project repositories. Be prepared to explain your contribution to each project and any impact figures stated in your resume.
